

3rd-party software

In case you are using a 3rd party mobility management software, chances are that they are currently connecting their software to the Erasmus Without Paper Network to provide you with the functionality to send and receive mobility data via their software. Please get in touch with your respective mobility management software providers to learn more about their involvement in Erasmus Without Paper.

Overview of the current 3rd party mobility software providers that were part of EWP projects and initiated the connection with the Erasmus Without Paper Network:

- [CINECA's ESSE3 in Italy](#) (Link only for CINECA customers - login to Confluence space required)
- [MUQI's USOS in Poland](#)
- [QS unisolution's MoveOn](#) (Link only for QS customers - login to Zendesk required)
- [SIGMA in Spain](#)
- [SOP's Mobility-Online](#)
- [Unit's FS in Norway](#)

Other third party providers in production

- [ErasmusPort](#) (TR)

Third party providers that are in contact with the EWP team (none of them in production yet)

- Anova Consulting (Greece)
- Digitalis (Portugal)
- Kion Turkey
- OSIRIS in the Netherlands
- Solenovo's SoleMOVE in Finland
- Submit (Ireland)
- TerraDotta in the US

If you know of other 3rd party providers who are preparing to join EWP, let us know [here](#) or give us their contact info. But each third party provider is responsible for its own software, so we can only act as an intermediary.
