

Notifications in the Erasmus+ App

Students can already receive notifications on Online Learning Agreement updates directly in the App that inform when the Online Learning Agreement has been prefilled, signed or rejected as well as finalised.

Students can also receive such updates as push-notifications and choose which ones they want to receive via the profile settings - easily enabling and disabling them.

More services that would share their notifications with the App are already under way and the student would be able to choose which are relevant for them and for which they would want to receive the notifications.
