

Is it safe to manage the student information through the Erasmus Dashboard?

It is much safer than sending documentation by email or post. We take reasonable measures to protect student information from unauthorised access or against loss, misuse or alteration by third parties. All connections to the Erasmus Dashboard are encrypted and authenticated via a digital certificate; encryption is also used in the links circulated through the email notifications. The respective databases are registered with the [Luxembourg National Commission for Data Protection](#) and the legally binding terms of use forbid the EUF and the ESN to disclose student data to third parties (sending /receiving HEIs not included).
