# Welcome page EDSSI Knowledge Base (old)

In the different spaces and articles in this knowledge base you can find information on **how to digitalise internationalisation** processes at your Higher Education Institution. The main target groups for this knowledge base are **staff members supporting student mobility** both at Higher Education Institutions and at the National Agencies.

The aim of this knowledge base is to provide you with information to understand the different digitalisation components and support you in creating the **pathway towards joining the digital ecosystem** supporting student mobility. For this exercise it is important to start from the context at your own institution and the tool(s) that you use to manage Erasmus+ mobilities:

What tool is your university using to manage Erasmus+ mobilities?

- No tool
- 3rd party mobility software
- In-house built mobility software

Communicate and exchange data easily with partners

- Use the Erasmus Dashboard to connect to Erasmus Without Paper [link to Dashboard space]
- Join Erasmus Without Paper via your software provider. [link to EWP space]
- Join Erasmus Without Paper by connecting to the EWP network [link to EWP space]

Provide seamless student access to academic services via their institutional login

- Connect to eduGAIN [link to MyAcademicID]
- Connect to eduGAIN & discuss with your provider about the European Student Identifier [link to MyAcademicID]
- Connect to eduGAIN & share European Student Identifier [link to MyAcademicID]

Promote the Erasmus App towards students to interact with the Erasmus programme

Inform your students about the benefits of the Erasmus+ App and update your institution profile via the Erasmus Dashboard [Link to Erasmus App space]

How to use this knowledge base?

There are separate spaces with targeted information on these specific digitalisation initiatives. Based on the picture above you should be able to identify what spaces are most relevant for you:

- **Erasmus Without Paper**, with comprehensive information about Erasmus Without Paper (EWP) supporting you to digitalise your Erasmus+ management.
- The **Erasmus Dashboard**, designed for institutions that are currently not using any digital solution to manage their Erasmus mobility management but also has some additional functionalities. The Erasmus Dashboard also includes information about OLA (Online Learning Agreement).
- **MyAcademicID**, a groundbreaking initiative to create a single European student eID that facilitates students to login to academic services via their home university login.
- **Erasmus+ App**, students' single point of entry into the Erasmus+ programme. The App will provide a broad range of information, tools and services to help students plan and carry out their exchange, supporting a first-rate mobility experience. It is also an important tool that can be used by universities to inform their students about different aspects of a mobility journey.

Information for colleagues with a technical background

We have dedicated information on the technicalities of Erasmus Without Paper, eduGain and the European Student Identifier. We therefore encourage you to consult the following technical resources:

- Developers page of Erasmus Without Paper written by and for developers: https://developers.erasmuswithoutpaper.eu/
- Erasmus Without Paper Github, a common space for all EWP-related Git projects: https://github.com/erasmus-without-paper
- MyAcademicID website with technical documentation: https://myacademic-id.eu/the-project/resources-and-tools
- Géant Wiki with information on joining eduGAIN: https://wiki.geant.org/display/eduGAIN/eduGAIN+Home
- Géant Wiki with information about the European Student Identifier: https://wiki.geant.org/display/SM/European+Student+Identifier
