

Does EWP include financial management tools

At the moment no exchange of financial data is possible, since the priorities of the EWP is first to digitalise all the templates supplied by the European Commission in line with the European Student Card Initiative roadmap. But EWP is not limited to its present APIs and even external providers can suggest new APIs to be supported and even design them. They can contact the [ESCI service desk](#) and join the discussions at Infrastructure Forum for more details.
