eQuATIC

Welcome to the knowledge base for eQuATIC!

eQuATIC is an online web service that could be used by institutions to evaluate their existing partnerships. The assessment is found on a set of pre-defined indicators that are calculated based on data that is uploaded in the tool. The data uploads in eQuATIC are Excel-based: institutions need to export data from their own system and transfer it into the existing Excel data templates before uploading them into the tool. Before you do any data uploads, you won't get results in eQuATIC.

On this site you can find documentation for eQuATIC administrators and users.

Browse through the articles on the left menu bar or use the search engine to find answers to your questions!
