Launch of the New Erasmus+ App!

The Erasmus+ Mobile App underwent a complete makeover and is ready to guide students through their Erasmus+ experience! The latest release is already available on Google Play and Apple Store and includes richer content while offering a smoother user-experience as well as the latest information on the Erasmus+ Programme and a new visual identity! Students can browse through the public feed full of tips and stories from peers as well as events and deals offered by student organisations! They can also log in and benefit from the Erasmus+ Journey that offers step-by-step guidance and information and access to relevant student services throughout the mobility, be it before, during or after.

The Erasmus+ App is a key ingredient of the [European Student Card Initiative](#), which aims to digitise and simplify the administrative procedures in student mobility. The launch conference will take place on January 28th and will gather student representatives as well as IROs. Don't miss the chance to get to know all the new features of the Erasmus+ App!
