# Changes to the OLA - Versioning

Students will now be able to easily adjust all the key values in the OLA when performing updates throughout their mobility.

All the parties involved can see the latest version of the document with the most up-to-date information as well as the history, namely a summary of the changes and overview of the versions of OLAs that all the parties have committed to.

The summary or the final OLA illustrates the latest legally binding version of the document, i.e. the current list of courses that are the result of additions and deletions over time.

The revisions illustrate a list of summarised updates indicating the values that were changed. According to the new Erasmus+ Programme, the During Mobility part is replaced with Versioning of the OLAs, providing Sending/Receiving HEIs and students a clear overview of the changes.
