My institution is not on the list of institutions of Erasmus Without Paper, how can we join

If your institution is not listed in the Erasmus Without Paper coverage matrix, it means that your institution did not yet decide to activate the connection to the network. Depending on your situation, you will either connect your own information systems directly to the network, or ask your software provider to do so, or use the cloud-based platform to do so. In any case, more information can be found in the Erasmus Without Paper competence centre.
