

# Functionalities

The Erasmus Dashboard is a **free-to-use** tool providing you with the basic functionality needed to manage the mobility processes for Erasmus+. In the long run it will offer functionality to manage the whole mobility cycle. Currently two important parts of the infrastructure are already developed:

- [Online Learning agreement \(OLA\)](#): the online tool for creating, negotiating and updating learning agreements in a machine-readable format;
- [Inter-Institutional Agreement Manager](#): a tool that allows creating, negotiating and updating Inter-Institutional Agreements in a machine-readable format.

Moreover the Erasmus Dashboard offers functionality to share updates about the [COVID-19 mobility status](#).

Interested in upcoming functionalities, find more about it [here](#).
