# Type of data Processed

Automatically collected data. The computer systems and applications dedicated to the functioning of the Online Learning Agreement platform detect, during their normal operation, some data (whose transmission is implicit in the use of Internet communication protocols) potentially associated with identifiable users. Among the data collected are IP addresses and domain names of computers used by users who connect to the site, URI (Uniform Resource Identifier) of requested resources, the time of the request, the method used to submit the request to the server, the size of the file obtained in reply, the numerical code indicating the status of the response from the server (successful, error, etc...) and other parameters regarding the operating system, browser and computer environment used by the user. These data are processed, for the time strictly necessary, for the sole purpose of obtaining statistical information on the use of the site and to check its regular operation. The provision of such data is compulsory as it is directly related to the web browsing experience.

Data provided voluntarily by the user. The voluntary and explicit communication of Personal Data to the EUF through the Online Learning Agreement platform implies the knowledge of this Privacy Policy, with the relevant request for consent and the eventual compilation of forms specifically prepared for this purpose.

If the Personal Data communicated to us does not belong to the same natural person who communicates it, the latter will be required to explicitly confirm that they have obtained the relevant consent from the Data Subject. In such cases, with the vision of this Privacy Policy and with the above-mentioned confirmation, the subject who communicates the Personal Data also undertakes to hold EUF harmless in case of false or reticent statements, in particular in case they have not actually obtained the consent to the processing from the relevant Data Subjects.

The voluntary sending of e-mails to our e-mail addresses does not require further information or requests for consent.

On the contrary, specific summary information will be reported or displayed if needed in the pages of the site prepared for particular services on request (form). The user must therefore explicitly consent to the use of the data reported in these forms in order to send any request.

**Cookies**. The Online Learning Agreement platform site uses cookies. The data collected through cookies can be used to access parts of the site or for statistical purposes or to make the browsing experience more pleasant and efficient in the future, trying to assess user behaviour and modify the proposed offer of content according to their behaviour.
