Technical testing and validation

From the moment that the **Dashboard has been fully integrated with the EWP Network** (effective 12 June 2021) all the data exchange processes fall in one of these two categories:

- Dashboard to Dashboard users;
- Dashboard to users in EWP, represented via 3rd party mobility management software providers (3PP) or HEI in-house built systems.

Technical testing and validation has been/is carried out between the concerned engineering teams of the Dashboard and any 3PP in order to ensure the correct functioning of the digital tools

Please note, that while it does not guarantee a bug-free data exchange it should provide a clear enough **signal** to the universities **that a given exchange is viable.**
In order to make this process as transparent as possible, we also publish a regularly updated list of which technical tests have been successfully completed, below.

-**If a given provider is not listed here** please do not assume that the EWP connection can be successfully established through the Dashboard from your organisation.

-Conversely, if the provider features in the list but you encounter issues exchanging data please feel free to contact the ESCI support desk.
