

Erasmus Skills

The [Erasmus Skills project](#) created a tool for mobile learners to assess their mobility and the skills they acquired while carrying it out. The tool has been [integrated into the App](#) so that users that already have an account can move seamlessly between the two platforms and even see the results of their quiz on the App, while those that never used it can easily register and take the quiz directly from the App.

Skills Assessment

Choose a mobility to assess your skills and/or consult your results
