

# How can HEIs access the EWP Dashboard

HEIs can create their main account here: [EWP Dashboard](#). Please bear in mind that only institutional email addresses are accepted (e.g. no hotmail or gmail services). The registration process should be carried out by a manager from the International Relations Office, as this person will give access to other colleagues within the HEI so that they are able to access the EWP Dashboard using their own accounts.

After the registration of a HEI, the indicated data is checked before the account is validated. The notification will be sent to the main institutional email address with an invitation to create a password and instructions on the next steps.

Please also see more information [here](#).
